Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, and 7-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Van Gompel et al. (6,132,410).

With respect to claims 1 and 2, Van Gompel discloses an absorbent garment, as shown in figure 1, having a front and rear waist regions and a crotch region. The garment comprises a liquid barrier layer 30, a stretchable carrier layer 50, an elastic layer 52 and 53, and an absorbent section 48, as shown in figures 1A and 1B. The elastic layer 53 is attached to the stretchable carrier layer 50, as shown in figure 1B. The absorbent section 48 is disposed on the inner surfaces of the liquid barrier layer 30 and the stretchable carrier layer 50, as shown in figures 1 and 1A.

With respect to claims 7 and 8; the elastic layer 52 and 53 is attached to the carrier layer 50 on both sides of the lateral center line in both the front 59 and rear 58 waist regions, as shown in figure 1.

With respect to claim 9, the carrier layer 50 is fully capable of being stretched in the lateral direction.

With respect to claim 10, the elastic layer 52 has a fastener element 70 attached, as shown in figure 1.

With respect to claim 11, an elastic ear material 36 is bonded to the side edge of the elastic layer 52, as shown in figure 1.

With respect to claim 12, the ear material 36 has a fastener element 70 attached, as shown in figure 1.

With respect to claims 13-16, Van Gompel discloses in column 21, lines 57-67, the method of making the garments is disclosed in U.S. Patent 4,938,753, which is incorporated by reference. Van Gompel ('753) discloses the method of forming a series of garments and selectively cutting into individual garments, as shown in figure 14 and disclosed in column 12, lines 3-37.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patents 6,264,639 and 5,700,255 disclose absorbent garments comprising elastic layers.
